REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: prior art does not disclose an animal collar to be worn by an animal comprising a collar housing having an inside surface directed toward the animal during use and at least one electrode intersecting the inside surface at an electrode base and extending toward the animal during use. The inside surface of the collar housing having at least one high point surface extending above the electrode base and toward the animal during use. Prior art shows many collars with extending electrodes but no other raised surfaces or prior art shows a smooth, flat surface with no protrusions. The high points of the inside surface of the collar housing are considered to be novel.
